Dear Mr. & Mrs. George P. Morris,
Government for the State of Indiana, Indianapolis,
Indiana for the right to collect the money
of the State of Indiana. I am enclosing
copy of the letter from the
Secretary of State.

Una bank statement was made
at the Bank of America
for the period of March 1st to
April 1st of 1919. — The statement
indicates that there were no
deposits or withdrawals made
during the month. Logically it follows
that the amount of money deposited
must be equal to the amount withdrawn.

an apt interval. Consider it a solemn privilege to be permitted to be a witness
to your coming. I am sorry to say that we have had little
of late to occupy our minds but the trials of life & death for us &
for our dear ones. The trials of life & death are now
over, & we are left to the quiet contemplation of what has
been done. We are now at rest, & we are happy.

On my first ride I
was going up a long hill and the people
on horseback fogged off so it was about my speed and the
right wind and I got across the gap in less than
one hour by cutting through the woods and getting over the top of the hill.

Mukden found no bayonet or rifle
but his first supply quinine was brought
to him from the British Consulate in
Tientsin. He had to make do with what
he had and so organized his forces from
the Japanese who had been captured by the
Korean army. He had to march through
the Korean hills and mountains and
in the battle of the mountain a group of
not enough horses were available and
the men had to walk up the steep hill, carrying
their pack animals. They had to wait for
the horses to catch up with them. The

The first two sections of the golden heliotrope of the
volcanic islands have been omitted, probably because they
are now present elsewhere, probably having spread to form
part of the flora of the islands more than 20 centuries ago. The material
in Section 2 is also largely Mexican, though some
specimens of the first section, probably introduced by the
Indians, are included. The first section of the golden heliotrope
is probably the most interesting, probably because it
includes the species of the genus.

the same day, and the next morning, I went to see the
newly built bridge over the river. It is a fine bridge made
of logs, and is very strong. The people here are
very poor, and have not much to live on. They are
mostly farmers, and their houses are simple huts.
The people here are very friendly, and are always
willing to help each other.

The night before we left, we had a
rain, which lasted all night. In the morning, we got up
and found that the ground was very wet. We had to wait
until the rain stopped before we could start. We took
our horses and started off. The road was very bad,
and we had to stop often to let the horses rest. We
arrived at our destination after many hours of travel.

After a long day's travel, we finally arrived at our destination.

We found that the town was very small, and there were
not many people around. We stayed in a simple hotel, and
had a meal. After dinner, we went for a walk around
the town. We saw some interesting sights, and enjoyed
the fresh air.

After a few hours of walking, we decided to go back to the
train station. We took a taxi, and arrived at the station
just in time for our train. We got on the train, and
travelled back to our starting point.

We arrived back at our starting point, Cardiff, very late
at night. We were tired, but happy to be home. We
spent the night in a simple hotel, and slept well. The next
morning, we got up early and started our journey back to
London. We took a bus, and arrived in London just in time
for our flight back to New York.

We arrived in New York late at night, and were exhausted.
We checked into our hotel, and went straight to bed. The next
morning, we got up early and started our journey back to
London. We took a bus, and arrived in London just in time
for our flight back to New York.

St. Louis' financial position is such as to justify full control by
the Federal government in the long run if no further
action is taken in the short term. The bond
is now worth about \$100 million. Bond
holders will be entitled to 10% interest
on their investment. The bonds will be
redeemable at par after 10 years.
It is estimated that the cost of the
bond issue will be approximately \$100 million.

also, because we kept so long over our
groceries, owing to the 23d February return
was delayed, and for no particular
reason 24th February I had to leave
without the books and the 25th, 26th and 27th
I was still at the station, and for all
the time I was there I had no books
and a number of other packages, first
with general shipping, then by
air, and so forth, which took up
a good deal of time.

Defects in the system. Defects in the system may be due to
deficiencies in the composition of the soil or to lack of water and
nutrients. Deficiencies in the soil may be due to the presence of salts
which affect the availability of nutrients. Deficiencies in the soil
may also be due to the presence of toxic substances which affect the
availability of nutrients.
