

—  
Omar had a Large potter's wheel but he never  
used it. And he always kept his tools very clean.  
He used to paint pictures on his pottery,  
and sometimes wrote poems on them. He was  
very poor but he was a very happy man.

Comparative Layer of soils below the Alluvium  
and Cenozoic rocks at the top of the transgression.  
The soils have developed in the alluvium and the old  
Cenozoic rocks under various geological conditions  
but the foundations are the same. The elements  
of the soil / Boulders / Sand and clay are derived  
from 239 feet height, with layers of sand + mud over  
the surface of which calcareous pebbles have been  
deposited. The upper part of the alluvium consists of  
calcareous sand with some fine gravel and sand  
and the lower part of the alluvium consists of fine sand  
with some pebbles. The soil has been derived from  
the underlying bedrock and the bedrock consists  
of a series of horizontal layers of sand and clay  
with some pebbles. The bedrock consists of a series of  
horizontal layers of sand and clay with some pebbles.

omparende findest du in den nächsten -  
wochen zu sehen, also wenn du vorher  
in Paris das neue Theater besuchst du -  
der neue Landtag Blumenthal ist zu diesem  
Zeitpunkt die größte Attraktion des gesamten  
Viertels und es wird dort eine große  
Festspiele und Konzerte veranstaltet.  
Hier sind vorwiegend alte und neue Werke  
aufgeführt darunter Opern, Ballett und  
Musiktheater mit großem Erfolg.  
Hier kann man auch sehr gut unterhalten,  
da es hier viele gute Restaurants und  
café's gibt, wo man sehr günstig  
und lecker essen kann.
